## Circulation

The Journal of Ocean Technology has a current circulation of 1200+, strategically distributed to key oceans related industry, government and academic organizations worldwide. With a three-month shelf life and niche marketing approach, the JOT offers a premium venue for publishing, advertising and promoting ocean technology around the world.

## Our Photo Contest

Got a great picture? Share it with us and you may be featured on the cover of the next issue of The Journal of Ocean Technology, which will be seen around the world. Check out the themes for our forthcoming issues to help guide your entries. For more information, get the details online at [www.journalofoceantechnology.com](http://www.journalofoceantechnology.com). If your photo is selected, you will win a one-year subscription to the JOT.

## Student Essay Contest

Whether you are in high school or a post-secondary institution, we want to hear about your oceans related interests. If you or someone you know is up to the challenge, contact our editorial staff today. For more information, go to [www.journalofoceantechnology.com](http://www.journalofoceantechnology.com).

## Letters to the Editor

At JOT, we welcome your input. Why not write us to tell us what you think of our publication, what you like, what you don't and your thoughts on ways to improve it. Simply e-mail us at [publisher@journalofoceantechnology.com](mailto:publisher@journalofoceantechnology.com). We look forward to your input.

## Academic & Scientific Credentials

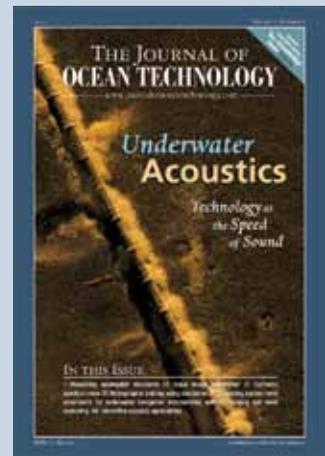

The Journal of Ocean Technology is a scholarly periodical with an extensive international editorial board comprising experts representing a broad range of scientific and technical disciplines. Editorial decisions for all reviews and papers are managed by Dr. David Molyneux, Oceanic Consulting Corporation in Newfoundland.

The Journal of Ocean Technology is indexed with Scopus, one of the largest abstract and citation databases of peer-reviewed research literature and quality web sources. Such indexing allows us to further disseminate scholarly content to a larger market; helps authenticate the myriad of research activities taking place around the globe; and provides increased exposure to our authors and editors.
