Ship design

V15N4 Winter 2020

The winter 2020 issue of the *Journal of Ocean Technology* will focus on [ship design](#). We'll be looking at ship design in response to environmental issues, green technologies, sailing in icy waters, improvements, standardization of designs, etc. We are inviting the submission of technical papers, essays, and short articles for this issue.

Technical papers describe cutting edge research and present the results of new (i.e., not previously published) research in ocean technology, science or engineering, and be no more than 7,500 words in length. **Student papers are welcome.**

Essays present well-informed observations and conclusions, and identify key issues for the oceans community in a concise manner. They are written at a level that would be understandable by a non-specialist. As essays are less formal than a technical paper, they do not include abstracts or a listing of references. Typical essay lengths are up to 3,000 words.

Short articles are between 450 and 900 words and focus on how a technology works, evolution or advancement of a technology plus viewpoint/commentary pieces.

Important deadlines

Technical paper submissions: August 21, 2020

Expressions of interest for essays or short articles: August 21, 2020 (deadline for submission of materials is October 23, 2020)
