## Aquaculture

V18N2 summer 2023

Our summer 2023 issue will focus on aquaculture. We'd like to hear about innovations used in aquaculture cages (moored, free floating, submerged, etc.); technology used to support aquaculture such as underwater vehicles and drones, sensors, aeration, feeding, computer vision, artificial intelligence, virtual reality, etc.; and similar topics. We invite the submission of technical papers, essays, and short articles for this issue.

Technical papers describe innovative research and present the results of new (i.e., not previously published) research in ocean technology, and be no more than 7,500 words in length. **Student papers are welcome.**

Essays present well-informed observations and conclusions, and identify key issues for the oceans community in a concise manner. They are written at a level that would be understandable by a non-specialist. As essays are less formal than a technical paper, they do not include abstracts or a listing of references. Typical essay lengths are up to 3,000 words.

Short articles are between 450 and 900 words and focus on how a technology works, evolution or advancement of a technology plus viewpoint/commentary pieces.

All papers, essays, and short articles are published online in open access format – making them accessible to anyone, anywhere.

## Important deadlines

Technical paper submissions: February 17, 2023. **This should be the full paper.**

Expressions of interest for essays and short articles: February 17, 2023.

- After February 17, the JOI team will review all submitted expressions of interest (EOI) and prepare a content outline. Should your EOI be accepted, the deadline for submission of materials is April 21.

## Format

Expressions of interest for essays and short articles should contain the following information:

- Proposed title of article
- Type of article (essay – up to 3,000 words; or short article – up to 800 words)
- Name(s) and affiliation(s) of author(s)
- Short summary of article (no more than 200 words)

Submit both technical papers and expressions of interest to:
